RESOLUTION ON SITUATION IN GERMANY

Adopted by N. E. C. of Young Workers (Communist) League

The National Executive Committee of the Young Workers (Communist) League of the United States of America, recognizing the situation in Germany, underscored by the collapse of the German Communist Party, with its membership down to about 50,000, in the revolutionary upsurge and the increasing strength of the Social Democratic and other rightist political forces in the country, has reported the situation to the Central Committee and the Sixth Congress of the Young Communist League.

The resolution recognizes that the German Communist Party’s efforts to remain in the government under the guise of “social democracy” have come to an end. The German Communist Party’s failure to outflank the Social Democratic Party has left the Social Democrats in control.

The resolution calls for the German Communist Party to unite with the Social Democratic Party on the basis of a democratic program, in order to fight against the Social Democratic Party’s program of national unity and to unify all the progressive forces in Germany under the leadership of the German Communist Party.

The resolution emphasizes that the German Communist Party must not only unite with the Social Democratic Party, but also unite with the workers and peasants in the countryside, in order to build a broad front and prepare for the decisive struggle.

The resolution concludes with the call for the German Communist Party to continue its struggle for the unity of the workers and peasants, and to prepare for the decisive struggle against the Social Democratic Party and its allies.
