Vol. 10. No. 6

From On Top!

By Elmer Bamberger

In 1917, a year of revolution, the working class made a great leap forward. The Russian revolution had brought down the Czarist monarchy, and the German revolution had brought down the Kaiser. The workers of both countries had taken to the streets in massive numbers to demand an end to the war and the establishment of a new government that would represent the interests of the working class.

On the anniversary of the Russian revolution, we pay tribute to the memory of those who gave their lives in the struggle for freedom. Their sacrifice will not be in vain, for their legacy continues to inspire us to fight for a better world.

We are committed to the principles of the Russian revolution, and we will continue to work towards a world where the working class is in control. We call on all workers to join us in the struggle for a socialist society.

INSTALLMENT PURCHASE SYSTEM INCREASES CONSUMER DEBT BUT NOT POWER TO PAY, SAYS EXPERT

By LINDA GOLDFABER, Editor-in-Chief

The installment purchase system, which appears to appease those who are in debt to installment purchase plans, is actually deceiving. The system is designed to attract consumers who are struggling to make ends meet, and it does so by offering the promise of goods at a lower price than if they were purchased outright. However, the true cost of these goods is much higher when the interest charges are factored in.

The result of this system is an increase in consumer debt, as people are lured into buying goods they cannot afford. This debt is then compounded by the interest charges, leading to a cycle of debt that is difficult for many to escape. The system is designed to profit from the vulnerability and ignorance of consumers, and it is important for people to be aware of the true cost of these goods before making a purchasing decision.

In conclusion, the installment purchase system is a deceptive practice that leads to increased consumer debt. It is important for people to be aware of the true cost of goods before making a purchasing decision and to carefully consider their financial situation before taking out a loan or signing up for a credit card.
